Last update: 16 Aug 2011

Using Locus on Android Phones and devices:

First you need to install the application and map:

- 1) Install the Locus mapping application from the Android Market (the QR code to the right will take you to the application).
- 2) Download the IROHVRA.mbtiles from the above website.
- 3) Connect your phone/device to your computer and select "Disk drive" mode (mount as a disk drive).
- 4) Place the IROHVRA.mbtiles file into the Locus\maps directory on your phone/device.

To use the map:

- 1) Start the Locus mapping application, the screen should look similar to the left screenshot below.
- 2) Select the "Map Manager" icon in the top right corner of the display (highlighted in red in the left screenshot).
- 3) On the "Map Manager" screen press on the selection box for the IROHVRA map (highlighted in red in the right screenshot).
